[Homeland Security: Federal Protective Service's Ability to Protect Federal Facilities Is Hampered by Weaknesses in Its Contract Security Guard Program](#) Mark L. Goldstein 2010-01 To accomplish its mission of protecting about 9,000 fed. facilities, the Fed. Protective Service (FPS) currently has a budget of about \$1 billion, about 1,200 full time employees, and about 13,000 contract security guards. This testimony discusses findings on: (1) the extent to which FPS ensures that its guards have the required training and certifications before being deployed to a fed. facility; (2) the extent to which FPS ensures that its guards comply with their assigned responsibilities (post orders) once they are deployed at fed. facilities; and (3) security vulnerabilities recently identified related to FPS's guard program. To address these objectives, the auditor conducted site visits at 6 of FPS's 11 regions, and interviewed numerous FPS officials. Illustrations.

Sustainable Horticulture Development and Nutrition Security (Vol. 3) P. Nath 2018-01-01 We all are indebted to nature for providing us food and its resources for our subsistence and survival. In the food domain, cereal and legume grains occupy the front line, whereas, horticultural crops have occupied the second line of defense. For healthy diet cereals and legumes provide us with carbohydrates and protein, whereas, fruits and vegetables provide us minerals and vitamins. Both macro- and micro- nutrients are essential for human growth and development. The fruits and vegetables are the major source of micro-nutrients. It is estimated that up to 2.7 million lives could potentially be saved each year if fruit and vegetable production was sufficiently increased. Both at national and international levels, food and agriculture/horticulture development plans and estimates are basically developed, framed and implemented, and narrowed down to cereal production. In the present context of attaining nutrition security, this mode of thinking on 'food' needs to be changed to 'nutrients', which will include necessarily all those crops including fruit and vegetables which provide all macro- and micro-nutrients to ensure balanced nutrition needed for good human health. The present publication has attempted to reflect and discuss the above views and ideas on the subject of sustainable horticulture development and nutrition security in nine chapters with 32 articles by 32 authors.

[Empowering smallholder farmers' organizations through non-public extension service providers: A case study and lessons from Mozambique](#) Gêmo, Hélder R. 2019-02-21 The role and impact of non-state extension services providers have not been studied adequately. In this paper, we assess the performance of the non-State extension service provision through farmers organization (FOs) in Mozambique. Using participating methods, focused group discussions, and key informant interviews, we provide an assessment of extension services provision to FOs. The result indicates only 3% of the 1264 surveyed FOs were categorized as "type A", the highest FOs rating scale used by services providers (SPs) in the three regions of the country. Effective monitoring and evaluation (regular, analytical, participatory) at field level and close working interaction between the Public Agricultural Extension Services (PAES) and the SPs were of paramount importance to track the progress made in empowering the FOs. SPs' pro-activeness and competence were critical factors to adequately address the various training needs of the different categories of FOs and local services providers. SPs' financial autonomy was key to compensate for the delays in the disbursements by the PAES. The selection criteria for the participating farmers (trainees) from targeted FOs makes a difference. Younger and more literate farmers (including women) have shown greater motivation and engagement in the training sessions. Outsourcing can be a valuable alternative for the provision of extension services if it targets specific intervention areas (for example, training for FOs), a limited number of activities, well-defined deliverables (including quality and sustainability issues) and timelines. Post-training (and post-project) actions at the policy level and extension services providers are required to contribute to the sustainability of the investment made. Based on these findings, the paper documents several operational lessons from the implementation of the program.

The Politics of Engaged Gender Research in the Arab Region Suad Joseph 2022-07-28 Critical analysis of what we know - and do not know - about women in the Arab region is needed to support social change. But how is knowledge on women and gender produced in the region? How does this change when it is undertaken by Arab women researchers? Through a critical examination of local fieldwork experiences, the contributors of the volume - who are Arab women researchers themselves - answer these questions. The book examines the specific structural conditions that shape people's lives in the Arab region, from the effects of imperialism, settler colonialism and the neo-liberalization of economies, to racial capitalism, securitization, and embedded patriarchal ideologies and structures. The authors assess the implications of these different dynamics on undertaking research and also examine their own daily lives, the lives of their interlocutors, and the practices of their field. In doing so, they are able to escape hegemonic approaches and frameworks to the study of gender and to instead theorize from the local context to produce knowledge as they see it. This 'engaged gender research' challenges dominant discourses in academia, rejects the presumptions of 'Arab exceptionalism', and challenges liberal feminisms. It devises a new way of undertaking research on gender in the region to lay the foundation for a more just tomorrow. Covering Morocco, Tunisia, Palestine, Jordan, Syria, Iraq and the Arab Gulf, the book argues that an engaged gender research - which is feminist and critically analyses the historical, political, economic and social contexts of the research topic first - will transform how we understand women and gender, and the Arab World.

Apple Pro Training Series Brian Gary 2007-05-31 Whether you're distributing dailies, authoring a commercial DVD, or prepping video clips for the Web, Compressor is essential for creating quality digital content. In this quick-reference guide, professional filmmaker Brian Gary reveals essential techniques for audio and video compression. Learn timesaving batch-encoding and test-clip workflows. Import files in Final Cut Pro and QuickTime formats and encode them for authoring in DVD Studio Pro. Use advanced codecs like H.264 to create standard- and high-definition content. Compress content for the latest hardware platforms, including AppleTV, iPod, and HD DVD. Export interactive podcasts. Add timecode window burns and animated logos during encoding. Take advantage of job-management strategies, such as job chaining. And save time with Compressor's ability to handle hours of encoding unattended and then notify you by email when it's done. With this guide you'll master the art of minimizing file size and maximizing image quality.

Governance of the Third Mission at a Multi-Campus University Benjamin Robert Schiller 2022-01-12 This book appeals to higher education scholars from various disciplines and practitioners looking for an overview and in-depth insight into cooperative study programs (CSPs). The CSPs combine elements of higher education with elements of professional work and illustrate how a teaching-related third mission achieves a socioeconomic contribution through its underlying stakeholder interactions. In Germany, CSPs are a growing phenomenon and, at the same time, a niche in higher education with approximately 100,000 students. Higher education scholars identified CSPs a challenge to higher education governance despite the simultaneous lack of empirical data. In this vein, this book pursues the question of how stakeholders influence the governance of the third mission in the case of CSPs. The study in this book refers to the "prime" example of CSPs at a German university of applied sciences—the Baden-Wuerttemberg Cooperative State University. The analysis revealed that four stakeholder groups are salient and influence the governance of the CSPs. These include professors, industry representatives, students, and representatives of government and higher education policy.

Operator Certification Study Guide John Giorgi 2003 This book is a revision of the popular study guide for water system last published in 1993. This study resource is a practical tool for treatment plant operators and distribution system personnel as they prepare for the certification exam. Actually formatting is used with the sample questions, all of which have been reviewed by ABC (Association of Board of Certification) and are based on information contained in the WSO training series Water Treatment Textbook and the Water Distributor Operation Handbook. Math formulas, conversation factors and other resource references are also included. Previous edition: 0-89867-685-1)
