From Glasgow to Ghost Gerry Cassidy 2011-02-01 During the turbulent sixties, young Danny Coyne and his family move from the city of

Glasgow to the Scottish suburbs. There he finds real friendship and religious bigotry in equal measure. He befriends Ray Shaughnessy, and the two became as close as brothers. Danny and Ray learn to survive everything life has to throw at them-until the day a local gang attack Ray and leave him for dead. In a fury of revenge, Danny is recruited by the Provisional IRA. He is trained to become a sleeper agent by the shady SA. After his first terrorist act, he realizes the terrible choice he has made, but blackmail prevents him from leaving the organization. With the help of one his targets, an MI6 agent, Danny flees Scotland to begin life anew in New Zealand under an assumed identity. But when the Provos find out where he is, Danny finds himself a pawn in an even deadlier game. About the Author: Gerry Cassidy grew up in a small town in the west of Scotland before immigrating to New Zealand fifteen years ago. He has spent the last thirty-five years working in the telecommunications industry and only recently became inspired to write. Though *From Glasgow to Ghost* is largely fictional, there are a number of incidents within its pages that are based on actual events, including those from Cassidy's own life experiences in Scotland and New Zealand. Cassidy's next writing project is a murder mystery that centers on Kiwi rookie cops trying to stop a serial killer. Uncle John's Bathroom Reader Vroom! Bathroom Readers' Institute 2012-08-15 Uncle John will get your motor running with this all-new edition dedicated to cars, trucks, trains, buses, motorcycles, mopeds, roller coasters...and of course, the Wienermobile. Uncle John has the need...for speed! (But he always uses his turn signal.) Hop on in and let the Bathroom Readers' Institute take you on the ultimate road trip. From the first motorized vehicles to the flying cars of tomorrow, you'll race around the world to learn about some great sets of wheels and the gear heads who make them go. And not just cars, this book has planes, trains, roller coasters, yachts, and massive machines that literally move mountains. So strap on your seatbelts--it's going to be a fun ride! Read about... \* Secrets of Hollywood car chases \* The original Cannonball Run \* Taking a ride in the hot-tub limo \* The drag queen \* The history of airships \* The Black Beetle: a New York Central train outfitted with jet engines \* The yacht that cost more than some countries' GDP \* Around the world in 25 ways \* A car without a driver \* A look at how a jet engine works \* Ghost planes and haunted ships \* Pal Newman buys a Beetle \* The origin of crash-test dummies And much, much more!

The Gods of Eden and Operation High Jump Moshe Mazin 2017-02-15 One of the most amazing epic stories in recent memory, the connection between ancient alien beings and human history is captured in this mesmerizing science fiction novel. A biblical passage from the Book of Genesis points the way to this connection, which recently has been tied to new excavations in Southeast Turkey, thought by several archeologists to be the site of the fabled Garden of Eden. The story ties the ancient Jewish staff of Moses to the Knights Templars, the Bilderberg Group, the American NSA, and Israeli intelligence services, all in pursuit of the secretive German Nazi Base 211 located at the South Pole in Antarctica. The American top secret Operation High Jump, which was recently partially declassified, raises many questions about the involvement of the world's governments in a cover-up of alien presence on Earth.

Creating Modern Capitalism Thomas K. McCraw 1998-01-02 What explains the national economic success of the United States, Britain, Germany, and Japan? What can be learned from the long-term championship performances of leading business firms in each country? How important were specific innovations by individual entrepreneurs? And in the end, what is the true nature of capitalist development? The Pulitzer Prize-winning historian Thomas K. McCraw and his coauthors present penetrating answers to these questions. Creating Modern Capitalism is the first book to explain for a broad audience the interconnections among technological innovation, management science, the power of entrepreneurship, and national economic growth. The authors approach each question from a comparative framework and with a unique triple focus on national economic systems, particular companies, and individual business leaders. Above all, the book focuses on how specific entrepreneurs influenced the economic success of their countries: Josiah Wedgwood and Henry Royce in Britain; August Thyssen and Georg von Siemens in Germany; Henry Ford, Alfred Sloan, and the two Thomas J. Watsons in the United States; Sakichi Toyoda, Masatoshi Ito, and Toshifumi Suzuki in Japan. The product of a three-year collaborative effort at the Harvard Business School, the book combines cutting-edge scholarship with a finely tuned sense of the art of management. It will engage general readers as well as those with a special interest in entrepreneurship and the evolution of national business systems.

The Flying Lady 1965

A Forgotten Man Geoffrey Elliott 2018-06-21 John Lodwick (1916-1959) was one of the great novelists of the early twentieth century. Yet his novels, and indeed his own extraordinary life story, have been virtually lost to the mists of time. Geoffrey Elliott here, for the first time, pieces together Lodwick's eventful life, from his youth in Ireland, to his wartime experiences in the SOE and Special Boat Service, his subsequent literary career and his untimely death in a car crash in Spain at the age of just 43. Initially acclaimed by Somerset Maugham and Anthony Burgess, soon after his death Lodwick's novels fell out of fashion and they have largely remained out-of-print since. Elliott makes the case for a revival in the fortunes of this singular English novelist, in a biography which sheds new light on the early twentieth century literary scene, the surrealist art world and the real-life experiences of World War II.

Boys' Life 1967-10 Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting.

Encyclopedia of Associations Gale Cengage Publishing 2008-04 This standard reference tool is the only comprehensive source for detailed information on more than 23,000 nonprofit American membership organizations of national scope. Every entry offers a wealth of valuable data, typically including the organization's complete name, address and phone number; founding date, purpose, activities and dues; national and

international conferences; and more. Each Supplement includes listings for more than 500 new organizations.

Legend of the Mighty Sparrow, Part 3 Bryan Fletcher 2016-11-15 This science fiction adventure represents the ultimate survivor genre, a hero against all odds, against powerful special interests too big to fail, a system controlled by ultimate insiders who often seem hell-bent on obsession, the last war, escalation, and world economic domination to create a brave new world; another dystopia. And the story focuses on a black site scientist with an urgent mission: to reach the next underground bunker with unparalleled destruction and equipment that smolders a place with sections that have damage beyond description, beyond all known languages from some unknown experiment, as the experiment may have fractured time or seriously damaged a local aspect of the universe. As people often say, the most important trait is location-location-location, a real estate term regarding a vital place or vulnerable point. And in this case, the concern is about a weapon of mass destruction, a favorite human pursuit since prehistoric times. And this weapon is not a mother of all bombs, not MOAB or the insidious neutron bomb, but a new-age experiment that directed a complex particle beam at a universal pressure point in spaceuniversal defect in space time or support aspect, well, similar to the way someone brings down a high-rise building by damaging the main support beam, and in this case, to collapse the universal wave function, as the universe may represent a bubble, a supreme algebraic bubble, a supreme bulkhead. And this secret military experiment, one without checks and balances, appears to have punctured the universe with a special warp bubble pierce and might initiate deflation at faster-than-light speed to deflate the universe, as space can move faster than light, which in this case will quickly collapse the universe to bring about the end of days, eschatology, the final events of history, and the ultimate human destiny.
