well as many fungi and algae. The limulus amoebocyte lysate (LAL) test is a quick and effective method of endotoxin testing, and is recommended for sensitive applications. Water samples that test positive with a glucan-sensitive endotoxin assay should be evaluated with a glucan-insensitive or glucan specific assay. It is always important to rule ...

Endophytic microorganisms: a review on insect control and recent ...

The importance of endophytic entomopathogenic fungi for insect control is also addressed. As the literature has shown, there is a lack of information on endophytes from tropical hosts, which are more severely affected by pests and diseases. Having this in mind, we have included an updated and extensive literature in this review, concerning new findings from tropical plants, ...
